None or Minor	CHEST DISCOMFORT	Very Likely

Disclaimer: The information provided in this material is for informational purposes only and is not intended as a substitute for advice from a physician or other health care professional.

PLEASE NOTE: Vomiting or loose stools are more common in children with the flu. The elderly may not present with as high a fever when they have the flu.

In general the incubation time for the flu is 1-4 days and a person is contagious for 1 day before symptoms appear until 5-7 days after onset, or until fever free for 24 hours.
